

AG-..

Galvanised extendable steel rods (round shape, ø 16 mm)

Application:

- For the evacuation of fault currents to earth.
- Extendable rods: the rods are connected to each other with the **MA** sleeve. The last rod receives the **PI** point.

Features:

- Steel with galvanization: according to EN ISO 1461 standard (average thickness 85 µm)
- Resistance: ≥70 daN/mm²

Accessories:

- Driving pins: **CH-L** (small), **CH** (large), **CH-MP** (with handle)
- Connecting terminals: **B** (bronze) and **D** (galvanised steel) models

Network Type : LV
