

Self-extending stainless steel rods (round shape, ø 16 mm)

## **Application:**

- For the evacuation of fault currents to earth.
- Self-extending rods: the lower end of each rod has a point intended both for driving in and connecting; the upper end is pierced, receiving, without any sleeve, the point of the previous rod.

## **Features:**

- Material: stainless steel EN 1.4028 (Z30 C13)
- Resistance: ≥90/100 daN/mm<sup>2</sup>

## Accessories:

- Driving pins: <u>CH-LMZ</u> (small model), <u>CH-MZ</u> (large model), <u>CH-MP</u> (with handle)
- Connection terminal: **B-CHROM** model
