

## MV-99-INS

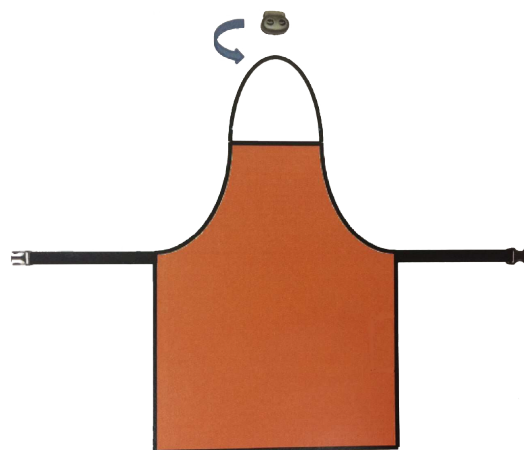

### Elastomer Insulating apron

#### Utilisation:

- Orange colored elastomer insulating apron used to insulate bare or insufficiently insulated conductive parts during the work.
- Thanks to its perforation resistance, it's well adapted to be in contact with aggressive metal parts.
- For low voltage use (class 0), up to 1 000 V AC/1 500 V DC.

#### Features:

- Withstand voltage: 10 kV. Test voltage: 5 kV/3 min.
- Material conforms to IEC 61112 with special properties:
  - Category A: acid-resistant.
  - Category Z: ozone-resistant
- Highly puncture-resistant material.
- Adjustable belt strap with plastic lock.
- Insulator's height: 65 cm. Width: 50 cm.

Reference	Voltage	
	Operating Voltage AC	Operating Voltage DC
MV-99-INS	1 000 V	1 500 V
