

CL-465-...

Voltage detector for high voltage substation 10-36 kV with stick

Network Type : MV

Application:

- Luminous Absence of Voltage Checker for HV substation with insulating pole.
- Maximum operating voltage: 36 kV.

Features:

- Built-in function control device.
- Robust molded thermoplastic housing providing excellent impact protection.
- Interchangeable V-shaped contact electrodes.
- 360° visual indication by means of a high visibility red LED.
- Lithium battery with 8 years autonomy in standard use.

Composition:

- Supplied in vinyl bag with wall brackets [CI-06-D](#).

Référence	Dimensions	Voltage range	Weight (kg)
	Length (mm)		
CL-465-10/36-M	1 250	10 - 36 kV	0,9
