

## MT-300..

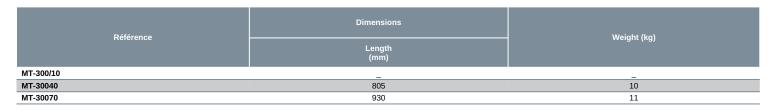

## Earthing equipment for third rail

## **Application:**

- · Earthing equipment for third-rail systems (subway, LRT).
- · For high levels of short-circuit current.

## **Features:**

- Earthing device according to IEC 61230.
- Nominal voltage: up to 750 V DC.
- High quality insulating tubes (IEC 60855-1).
- · Aluminium jaws on both sides to ensure optimum contact on third rail and running rail.
- · 2 copper cables with silicon sheath.
- Handling articulated lever.
- · Brass interchangeable parts for contact to the running rail and to the third rail.
- · Magnets on each side for easiness of mounting.
- Adjusting screw for strong and secure tightening of the system.
- · Weight: 10 kg
