

MG-22. / MG-22.-D

Insulating wedge with rope

Application:

- Allows separation/spreading of conductors and cables to facilitate work, without risk of damage to the conductor insulation.

Features:

- Made of reinforced thermoplastic.
- Wide groove suitable for the most commonly used cable cutters, with a notch to position the cable correctly.
- 2 cable gauges available with two side notches.
- Profile without sharp edges.
- Ergonomic grip and suitable for use with a chisel.
- Rope: 800 mm.

Ref	Dimensions	Weight (kg)	Voltages for use		Use
			Operating Voltage AC	Operating Voltage DC	
MG-222/1	265 x 57 x 60	0,500	1 000 V	1 500 V	Indoor/Outdoor
