

## JTN-...

Network Type : LV

### Belling tool for cable sheaths

#### Application :

- The Belling-Tool has been developed to enable jointers to bell cable earth sheaths during live jointing, where avoiding damage to insulation and observance of safety procedures are of primary importance. The tool is suitable for use on lead and aluminium sheaths, although extra care is recommended when belling aluminium in order to avoid tearing.

#### Features :

- Maximum operating voltage: 1 000 V AC - 1 500 V DC.
- Complies with IEC 60900 for live working up to 1,000 V AC and 1,500 V DC.
