Network Type : LV

Insulated inspection miror

Application:

- Insulating inspection mirrors are designed for inspecting areas that are difficult to access, while providing electrical insulation to protect users from electric shocks. These mirrors are commonly used in electrical and utility industries where there is a risk of contact with live electrical components or circuits.

Features:

- A useful aid for inspection in confined areas.
- Bend in shaft to help inspect hard to reach places
- Manufactured according to the International IEC 60900 standard for working with live systems up to 1 000 V AC & 1 500 V DC
- Entirely insulated.
- Choice of 3 mirrors
