

## MP-... 4\_100

## Insulating mat class 4 - width 1 m.

## **Application :**

CATU Electrical Insulating Mats conform to IEC 61111:2009 and are manufactured using high quality elastomer rubber in order to provide complete protection against electric shock, isolating users from potentially life-threatening electrical currents..

CATU Electrical Insulating Mats are suitable for use in outdoor and indoor applications and are generally placed in front of electrical panels, switch gears & high voltage equipment in order to create a safe working environment for the operators/users.

The choice of the class **must** be determined according to the maximal nominal voltage of the network.

Rigorous testing to conform to the IEC 61111:2009 standard includes:

- Puncture resistance test
- Flame retardance test
- Dielectric test
- Acid resistance test
- Ageing test
- Oil resistance test

- Features :
  - · Insulating mat for live and dead working.
  - Class 4 Maximum operating voltage: 36 000 V AC 54 000 V DC.
  - Used to cover the floor for the electrical protection of operators in electrical installations.
  - Protect the workers from the ground potential.
  - Must be adapted to the nominal voltage of the network supplying the installation on which it is used.
  - In accordance with IEC 61111:2009 standard and to specific properties of the "C" Category (extremely low temperature folding test at – 40 °C).
  - RoHS2 compliant. REACH compliant (SVHC free).
  - Material: elastomer, halogen free.
  - Thickness: 5mm +/-0.2mm.
  - D bar code (Datamatrix) on marking with direct link to user guide and technical sheet.
  - Storage temperature: +10°C to +21°C.
  - Operating temperature: -40°C to +55°C.
