

SL-106

Group lock box

Application :

- Device for storing the keys of safety padlocks.
- Prevents unintentional unlocking while operators are working on the equipment.
- Suitable for workgroups performing maintenance and repair tasks on machinery in a facility.

Features :

- 12 slots available to place the safety padlocks of team members.
- Key slot to insert an additional key if other power sources have to be isolated after the maintenance work has started.
- Internal quick-release button to lock/unlock the supplied wall base for both portable and fixed applications.
